

The global aviation industry has taken leadership on climate change, with a robust plan to reduce emissions based on a comprehensive set of goals. After 2020, technological, infrastructure, and operational efficiency measures will be complemented by the ICAO Carbon Offsetting and Reduction Scheme for International Aviation – better known as “CORSIA”.

CORSIA will help industry meet its goal of carbon neutral growth from 2020 in support of the Business Aviation Commitment on Climate Change. Basically, aircraft operators whose operations are covered will offset the growth in their carbon emissions in international flying on an annual basis from a 2020 baseline (i.e., the difference between the emissions of 2020 and those of subsequent years). The ICAO Standards and Recommended Practices (SARPs) spelling out CORSIA requirements are currently under development.

IBAC is coordinating with IATA (International Air Transport Association) to participate in numerous workshops in 2018 as well as participating in several discussions to help educate the business aviation industry on this upcoming CORSIA programme.

IATA 1-Day Workshops

(no charge to participate – business aviation operators invited to attend)

As the number of participants at each session is limited, please confirm your participation by email to corsia@iata.org as soon as possible.

IBAC Officials will be in attendance in the following workshops:

Miami

29, 30 January 2018

Geneva

28 February 2018 (near capacity)

1 March 2018 (newly added)

Singapore

8, 9 February 2018

Additional IATA Workshops:

Africa

Accra

13 February 2018

Johannesburg

24 January 2018

Americas

Buenos Aires

21 February 2018

Asia-Pacific

Shanghai

9 January 2018

Middle East

Amman

16 January 2018

Russia and Central Asia

Moscow

15 February 2018

Additional Business Aviation Events

where IBAC will also provide CORSIA presentation/workshop:

West Palm Beach, Florida USA

24 January 2018

Overview presentation at the NBAA Regional Forum

Geneva

actual date tbd

workshop during annual EBACE

Convention 29-31 May 2018

Waterloo, Ontario Canada

actual date tbd

workshop during CBAA Annual

Convention 12-14 June 2018

As the number of participants at each session is limited, please confirm your participation by email to corsia@iata.org as soon as possible.
