Don't Forget The IS-BAO/H LinkedIn Forum

This is a forum where operators, auditors, or those just curious about either International Standard to interact with peers, ask questions, and learn about important IS-BAO and/or IS-BAH events and news.

Currently in the region of 600 members!!! Thank you...

You can locate the forum [HERE](#).

Where do I go for help?

www.ibac.org/is_bah

Are we making a difference?

Currently 149 IS-BAH registered locations globally think it's worthwhile.

"The IS-BAH registration audit process has helped us set even higher standards and confirms our commitment to provide the safest possible operating environment."

"When selecting a handling provider, the ISBAH certification it is absolutely recommended! "

"This market-leading and standardised measure for handlers, FBOs and operators worldwide is a programme we strongly believe in and one we will be implementing in all our FBOs."

How do we spread the word?

To start, begin to recommend better ways of doing what you already do.

Believe in the change and speak up. Think of change not as a destination, but as a carefully designed process. Driving that process is a professional capability made up of important knowledge and skills that can and must be learned. By developing a deeper understanding of why change is difficult, how change initiatives go off track, and how to mitigate the risks, you can become a successful change agent—someone who can transform promising ideas into concrete, positive results.
